 ROZETTI

# SOLID SURFACE

**Solid Surface** is an advanced composite of mineral materials and acrylic resin known as Korin in Iran.

It provides the possibility of making an ideal surface for consumers. It provides different residential and industrial

**This material has been used in developed countries for more than 30 years**

Why should we use this material ?

- **Long life**
- **It can be Renovated ( no need to replaced )**  
maintenance method : sharp and hard objects should never be used but in any damage can be easily polished to restore the surface
- **Ease of maintenance and cleaning**
- **The possibility of designing beautiful and unique forms**
- **Anti-stain, anti-crime and antibacterial**
- **Very high resistance to moisture penetration**
- **Resistant to impact and destructive acids**
- **Ability to cut, bend and drill**

ROZETTI

## PRODUCT FEATURES

High-quality raw materials are used for the production of products in Rozetti Company. Production of cabin, box and mirror frame is usually done using

PVC (Polyvinyl Chloride) or Plywood sheets depending on the design of the product. Both types of these sheets have advantages over MDF (Medium Density Fiberboard) sheets that make their use preferable in situations such as bathrooms, toilets and even under the kitchen sink. Although the use of MDF sheet is apparently affordable, but due to the use of urea-formaldehyde adhesives, MDF sheet has a significant amount of formaldehyde (approximately 9%).

This substance is released in the form of gas over time, and by inhaling it, some people may experience negative side effects such as watery eyes, burning sensation in the eyes and nose, wheezing in the chest and throat, nausea with coughing, or skin irritation. In addition, the most important advantages of PVC sheet are as follows:

- 100% Waterproof and moisture-proof;
- Could be fit the decoration style of most modern homes;
- More durable than MDF;
- Anti dust and Easy to clean;
- Practical, modern and stylish;
- Could be paint in any color without ruining its look;
- Eco-friendly (recyclable) material;
- Flexibility (Bends more easily to various forms of design);
- Anti-acid and having high resistance to chemicals;
- Resistant to germs, fungi and pollution;
- Fireproof and self-extinguishing;
- Resistant to corrosion and decay;
- Resistance to pests such as termites;
- Resistance to spoilage of screws.
